COLUMBIA, ADAIR COUNTY, KENTUCKY, WEDNESDAY, MAY 31, 1916.

NUMBER 31

SATURDAY'S R. R. MEETING.

The railroad meeting last Saturday, was not an overflow gathering due to the fact that farmers were unusually busy, but it showed the spirit of united effort and a determination to win. Several thousand dollars were secured mainly due to increase in original pledges and if we are not badly deceived \$8,000 more will guarantee the proposition. This week will be used in securing this amount and in transferring subscriptions from the first to the present proposition. Fifteen or twenty men from and near Columbia are now actively in the work and a good number of active men from nearly every section of the county have subscription papers and doing all within their power to make the road a certainty. Next Saturday is the time to report and to determine whether or not we will meet the proposition. Dr. Hunter and associates are bound to know, at once, whether or not we want them to build the road for they have another proposition which they are holding off for our decision which they will accept if this is not closed at an early date.

There is no chance for any one to lose on the present proposition and if we get the amount required by Saturday a contract will be made and work started at once. The importance of every honorable effort to secure the sum needed should impress every man who desires development of our commercial resources, who wants opportunity for the rising generation or increased values for the present. When the road has been built, when its effects are shown on Columbia and Adair county, or we should say, this entire section of the State, no one will regret any effort or expense given to secure it. If we fail to meet the present proposition it would be the most serious mistake we have ever made. Its failure would not only hold this section to the old order of doing, but would paralyze ambition and effort for a long and indefinite period and leave us far worse off than if we had made no effort to secure it. It is too important for any good citizen to withhold liberal aid.

Every body should help and help now while we have an opportunity to succeed. In the closing, after the bulk of the people have contributed, eight thousand dollars is a considerable sum to raise, but it must be done or we lose. Five men of this town gives ten thousand dollars to the fund and several others are on record for a thousand each. The citizens of Columbia will do a liberal part and ask only that the county people give reasonable help. The work is now on in earnest, the closing day is next Saturday. We win or lose, close the contract or drop it like a hot iron after that date. If you have given you had better increase your subscription a reasonable amount to make it a certainty. It is not safe to offer and risk the smallest amount that might possibly secure it, but to put up the fullest you are willing to give rather than lose it. If too much should be subscribed your pro rata part will be returned, if too little is offered you fail. Every body should get busy, keep busy and report in Columbia next Saturday at one o'clock.

No road, no pay is a safe proposition, and no road no progress for this section is a certainty.

Mr. N. M. Tutt and Mr. G. R. Reed have formed a partnership and will engage in the real estate business. They are both reliable gentlemen and will know how to handle the business that will come to them. They will office in the same room, in the Jones block, now occupied by Mr. Reed. A little later The News will contain an ad showing their manner of doing business. This partnership will not interfere with Mr. Reed's insurance business.

Dr. J. T. Jones, who recently moved from his home, near Columbia, to Glenville, was in town Friday. A News man asked him when he would return to his home near this place. "Oh, I don't know; the old woman is mad when we are out there and I am mad when here; so I don't know what we will do."

Mr. J. C. Strange and son, Sanford, caught three catfish late Thursday afternoon. They measured, 21, 23, and 26 inches in length. They weighed 15 pounds.

A Plea for Quicker Transportation.

Burkesville, Ky., May 28, 1916.
Editor Adair County News:—

In the days when Augustus Caesar was master of many Kings, outside of this, there were two things in his life that perpetuated his memory, "The Star in the East" and an appellation that he so often applied to himself, as the "Master Road Builder." It was necessary for the continuity of the domains over which he so boldly held sway, for a more perfect development of same along commercial and military lines, to have these different domains and possessions connected by a network of good roads, such roads as a Caesar could build, that stand to-day as an everlasting monument to the master man, in speaking of Gaul, "there is no good country without good roads." At the dawn of our Christian development a Pagan Emperor to give us this lesson should not be so easily forgotten.

Good roads tend toward a greater development along all lines, especially along the lines of least resistance, both from a physical and economic standpoint, I do not suppose any one will take issue with me for advocating good roads, no more than for the proper training and development of our children, the only possible difference would be in the modes or manner, all tending to the same goal, some would prefer the Public Schools to private, and while others technical to academic, same as road building, some cry for the Coffey law, the King Drag, some private subscription, others hallooing let the State and Federal Government do it, some lets Bond her, so we all agree so far as the roads are concerned.

Columbia is the best inland town in the State and Adair one of the best counties, the citizenship of either is unsurpassed, the only thing that has kept Columbia and Adair off the map has been the lack of transportation facilities, that alone will keep any country back or any people be whom they may. The Rapid Transit Company has taken a step in the right direction, and should be more than commended for the good work they have done. The next step and the culminating, is the railroad.

I have just returned from Columbia and spent a most pleasant week with my many friends, and while there it was my more than good fortune to see a good deal of my old friend and acquaintance, Dr. W. Godfrey Hunter, whom together with his associates offer to Columbia and Adair county, seems to me a Railroad on a silver platter, and I believe there are enough intelligent men and women in Adair county to see this and accept same without delay. I was associated with Dr. Hunter, legal capacity, in the street car franchises in the city of Somerset, 1906. Under adverse conditions and political intrigues against him, succeeded in giving to that city a street railway, water, light and other municipal assets, that she did not enjoy before. Dr. Hunter does things and if the people will give a helping hand, a band of steel will connect them with the outside world and that shortly.

Then I can close my eyes and get a glimpse of the future, to Breeding a good road, Jamestown, Liberty, Russell Springs, and in fact the county becomes a net work of the mater worker, whether by Bonds or otherwise I do not know, but I do know that the good roads are coming and that soon. The Bonds, or the Bond issue is the best, quickest, surest and most economical way to build roads. If the county officers or those having charge of the Fiscal and Corporate affairs are honest, business and painstaking men, and will well and truly see to the application of the purchase money, in this event if properly applied, the Bond indebtedness becomes an asset rather than a liability.

Here in Burkesville we are doubly interested in the outcome of the railroad and your good road movement. If the railroad comes Columbia will necessarily be our objective point. It is our best and shortest way to the outside world. We have an election here shortly submitting to a vote of the people Bonds—Roads or no Roads? We have an efficient County Judge and fiscal court, and we expect results. We are going to have good roads whether by the technical or academic route, so Adair get ready and meet us?

Yours,
W. T. Otley.

A Railroad Now or Never.

The terms of the proposed contract between a committee of citizens of Adair county and Dr. W. G. Hunter and his associates are substantially as follows:

Dr. Hunter and his associates agree to organize, issue their own bonds, make the surveys at their own cost, and build a railroad from Campbellsville or Greensburg, or some intermediate point on the L & N. railroad between said points to Columbia and put it in operation within eighteen months from the date of the contract.

The route for the road and the points for stations will be fixed by the joint agreement of the contracting parties. When said road has been constructed to Columbia and is in operation, they are to be paid by us fifty thousand dollars, and unless they do this they will not receive a cent.

The people at this end of the line are also to pay for the right of way. Of course, if the road is not built, there will be no need for a right of way. So, if we pay our money we get the road, and if we do not raise the money we can not get it. That is the long and short of it, and it is up to our people to say whether this opportunity to secure a road shall be lost or whether we will take advantage of it. If the road is built, it will benefit every part of the county, and every citizen in it. Therefore, every one should aid in securing it. We publish herewith the obligation which our citizens must sign in order to enable the committee to contract. It involves no complications. Its provisions are plain: if we do not get the road, we have nothing to pay. The money must be subscribed at once. Let every one—man and woman, help this enterprise. The paper to be signed reads as follows:

"We the undersigned in order to secure the building and putting in operation a railroad from Campbellsville or Greensburg, Ky, or some intermediate point on the Louisville & Nashville Railroad to Columbia, Ky., promise to pay to E. H. Hughes, W. W. Jones, Brack Massie, R. F. Paull, J. N. Coffey, Gordon Montgomery, N. M. Tutt, J. O. Russell and C. S. Harris, whom we hereby appoint as trustees and attorney's in fact to collect and hold said money and enter into contract for the building of said road, the sum set opposite our names respectively, same payable upon demand of said trustees, but same not to be due or payable until a sum aggregating \$50,000 has been in good faith subscribed on this or similar papers. Said sum is to be used in securing the construction and operating of a railroad to Columbia, Ky., and for no other purpose, and no part of same is to be used or paid out by said trustees until said road is constructed and is in operation to said town. When said road is constructed to Columbia and put in operation said trustees are authorized as our agents and attorneys in fact to pay to the person or persons, company or corporation with whom they may contract for constructing said road, the said fifty thousand dollars. If said road is not constructed and in operation within twenty-four months from date, this subscription is to be void and the money paid on same is to be refunded to us by said trustees. It is understood that the subscriptions recently made by us to the proposed Columbia Railroad are canceled and of no legal effect.

May 1916.

We have mentioned several times recently the immense poultry and egg business at this place, and there seems to be no let up. We are glad on account of the good farm wives and daughters that the business continues to grow and that the prices are satisfactory. One thing that an onlooker does not understand is, where do so many chickens and eggs come from, as many wagons loaded come to town daily. In the last three months tens of thousands of dollars have been paid by Grinstead & Co., this place.

We are not yet near out of the woods on our railroad proposition. We lack about \$6,000 in money and the right of way. This means much work yet. This condition should appeal to every citizen. Don't wait for some body else to do the work, Come forward yourself and see that the amount is made up, or else we may yet fail. Saturday is the day.

Oliver Popplewell.

The above is a good picture of Mr. Oliver Popplewell, who is a student going through the Lindsey-Wilson. In the month of May he entered in two track meets, one at Danville, and the other at Lexington—mile running race. He won at both places, defeating students from some of the best High Schools in the State. At Danville he came out thirty yards in the lead and at Lexington, fifty yards.

Up to the present time it appears that the people along the pike being built from Columbia to the Casey county line have done very little towards helping our railroad proposition. Can't they see the rest of the county is being taxed for their sole benefit? Does it not look like they are expecting to get the only pike to be built in years, and then the rest of the county also to put up all the money for the railroad, they will equally get the benefit of? Gentlemen along this pike, we ask you to come forward next Saturday and do your duty. You river farmers, come and show your appreciation for what you are expecting to get out of our taxes.

Left for New Mexico.

Last Saturday morning Prof. W. M. Wilson and wife left for Potosi, New Mexico, where the former will become the Superintendent of the public schools, that city.

Prof. Wilson's departure from Columbia was regretted by the entire town and he will be greatly missed socially and in educational affairs, having endeared himself as the head of the High school and Graded school of this place. He is a man of honor, possessing an irreproachable character, and having a disposition that wins friends from the start. Mrs. Wilson is a lovable Christian woman, a true Kentucky lady, whose graces will soon win friends in her new home.

The News extends to Prof. Wilson and his companion its very best wishes, trusting that they may have good health, grow rich in the goods of this world, then return to Columbia and enjoy the wealth that industry and knowledge piled up.

Mr. Romie D. Judd, this place, will finish at Georgetown June 7. Invitations to the commencement exercises have been received here. Mr. Judd is "Gifforian."

Mr. W. R. Todd, son of Mr. and Mrs. A. G. Todd, this place, who has been living away from Columbia for several years, has been elected Superintendent of the Stanford public schools.

The Ladies Missionary Society of the Presbyterian church will meet Thursday, June 1, at 2:30 p. m., at the church. There will be a good program. Please come.

Stabbing at Mt. Carmel.

Last Sunday a great many people gathered at Mt. Carmel, all-day services being in progress.

John Peterson, of Campbellsville, and Fred Gray, of Robinson Creek, Taylor county, were present. They were upon the outside of the building and it is reported here that they were both drinking. In the afternoon they got to fighting, and Peterson was badly stabbed by Gray. They left and Gray was arrested in Campbellsville, but was not incarcerated, for the reason that Peterson's father is the Jailer of Taylor county.

The authorities here were notified and Clyde Crenshaw and Nat Walker went after him, but before they reached Campbellsville, Gray had taken leg bail, and he is now at large. Peterson is said to be badly hurt.

Five men in Columbia have subscribed \$10,000 for the railroad. The town of Columbia has put down more than half the amount of the sum asked.

Mrs. Sarah Miller Dead.

Last Wednesday night Mrs. Sarah Miller, who was the mother of Mr. Frank Wolford Miller, died at her late home, on Green river. She was a victim of Pneumonia and was sick but a short time. She was seventy-odd years old, a good Christian woman, enjoying the respect of every body in the neighborhood.

The funeral was largely attended and the interment was at Tabernacle church.

Every representative farmer in Adair county should be here next Saturday.

Died in Taylor County.

Last Saturday morning Mr. W. S. Tandy, who was a brother of Mr. R. E. Tandy, this place, died at his late home, six miles from Campbellsville, on Lebanon pike. He was about eighty years old and had been a local Baptist preacher for many years. The funeral services were held Sunday. Mr. R. E. Tandy was in attendance.

Show your interest in the railroad by being in Columbia next Saturday.

The Parlor Circle theater will be removed from its present location to the second story of the building in which Mr. J. F. Patteson and Mr. L. M. Young are now doing business. The apartment is much larger and the ceiling higher than at the present location. Workmen are now elevating the floor and making other alterations necessary for the show business. The show will probably be in operation at the new place the latter part of the first week in June.

Everything looks good for the railroad proposition. Five or six thousand dollars will not deter the people of Adair county.

In last week's issue we reported that Mrs. M. H. Rhorer, of Middlesboro, had received a fall at Lebanon and was seriously injured. Later information is to effect that Mrs. Rhorer was not as badly hurt as was reported, and that the indications point to her early recovery. She was visiting her daughter when the accident occurred. Mrs. Rhorer's Columbia friends are glad to learn of so favorable information concerning her condition.

L. M. Young's fountain is now being installed. He will be ready for business in a few days.

Miss Hattie Mullinix, who is a grand daughter of Mr. and Mrs. E. F. Mullinix, this place, is Valedictorian and winner of Wineman Gold Medal, of Union High School, at Oxnard, Cal. Her brother, James, is Salutatorian, being second winner of highest honors. Graduation takes place June 8th, 1916. There are 100 High school students in the school.

Next Saturday will decide whether the survey will commence at once.

Farmers report that wheat has come out wonderfully since the rain, last week. Before the rain the heads were small, but now they are large and full. It now looks like an average crop will be harvested.

Our Indian Friends.

The Colony Courier, of Oklahoma, contains an unusually interesting local column this week. Our Indian friends have "made news" for the editor in "considerable quantity." And the editor, good Indian that we hope he is, prints in language plain and to point, as Indian speak. Here are a few "happenings" which we consider of sufficient importance to reproduce, even at this distance from Oklahoma:

"Little Bird and Hannah Little Bird are taking care of Ella Little Bird's house while she is in a hospital at El Reno. Ella was operated on at El Reno and is doing well."

"Swift Wolfe and James Monroe are baching together at Swift Wolfe house in Colony while Mrs. Swift Wolfe is off visiting friends and relatives near Calumet. Swift Wolfe buys the grub and does the cooking, James Monroe cuts wood, brings water and washes the dishes."

"Bichea charcoal has bought sewing machine from Colony Mercantile Co. Bichea has a white girl that is going to keep house for her and is also going to sew for her."

"Thunder Bull has employed Hot Tamala Man Mexican to farm for him this year at his place."

"Arapaho Medicine Men and Medicine Women are in camp at Two Babies to make their annual medicines out of different kinds of roots. They make their medicines once year this is an old custom of Arapahos."

"Creeping Bear and Bald Head are now living on Washita on Creeping Bear's allotment. The grass is good and they are grazing their Mexican mules. One of their mules is bad mule. Creeping Bear has named it Villa after the Bandit."

"Prairie Chief and his wife White Buffalo Woman have been visiting his son-in-law, Frank Hamilton and family for few days and have gone over to visit Perry Reynolds and his family on Deer Creek."

"Mountain Woman and Lucile Mountain have been out on Washita River visiting friends and relatives have returned to Colony to their home."

"Magpie Woman Wolf Chief has bought \$5.00 worth of seeds for Watan. Watan is going to make big garden at his home place east of Colony, this will be company garden as Magpie Woman is furnishing the seed and Watan the ground."

"Bear Bow and Black Eagle are going to put in garden together at Julia Lizard's place. this will be company garden also."

"Red Bird Wolf and his wife Magpie Woman have selected place on Magpie Woman's allotment to build their six room house and big barn, on Washita River near Big Jake Crossing. They are going to employ Lost Leg and Smells Like Bear, northern Cheyennes from Tongue Riv-

A Symbol of Health.

The Pythagorians of Ancient Greece ate simple food, practiced temperance and purity. As a badge they used the five pointed star which they regarded as a symbol of health. A red five pointed star appears on each package of Chamberlain's Tablets, and still fulfills its ancient mission as a symbol of health. If you are troubled with indigestion, biliousness, or constipation, get a package of these tablets from your druggist. You will be surprised at the quick relief which they afford. Obtainable at Paull Drug Co. Adv.

More Boys for Navy.

The preparedness program of Secretary of the Navy Daniels includes a special examination for entrance to the United States Naval Academy at Annapolis which will open a naval career to two hundred young men in addition to the number admitted to the academy in normal times. This step is taken to secure an adequate staff of officers to man the ships provided by the new naval building program.

When the recent act was passed increasing the number of appointments of each Senator and member of the House of Representatives from two to three, it was realized that little time remained before the April examination to permit of Senators and members of the House to select young men to fill the vacancies and at the same time allow sufficient time for the candidates to prepare for the examination. By holding another examination in July advantage will be taken of the new law to the fullest extent practicable to accomplish its purpose of providing more officers for the navy.—State Journal.

Acres for Homesteads.

Farm and Fireside tells us that measures looking to giving the states some 30,000,000 acres of public land are pending and that there is good chance that some of these will pass, now or in some future session. There are also some pending various measures to permit homesteads of areas up to 420 and even 640 acres to be taken up, in the remaining public lands, on the theory that the 640 acre homestead is too small, in semiarid regions, to be a working industrial unit.

"People who have ideas of 'going West,' we read, 'and taking up a homestead, after the fashion of our forefathers and grandfathers in the decades after the Civil war, should keep their eyes on legislation looking to giving away vast areas of the public domain. A long list of bills have been introduced, and some favorably reported, giving to the States great areas of the public lands, to be disposed of by them to raise funds for road-building, education, and other purposes. The Western States are making determined efforts to get great slices of the Government's lands turned over to them and not a few public men from States which contain no public lands are inclined to favor the scheme. They think the States on the whole know better how to get the best development of their lands than Washington does."

Watch Child's Cough.

Colds, running of nose, continued irritation of the mucous membrane if neglected may mean Catarrh later. Don't take the chances—do something for your child! Children will not take every medicine, but they will take Dr. King's New Discovery and without bribing or teasing. Its a sweet pleasant Tar Syrup and so effective. Just laxative enough to eliminate the waste poisons. Almost the first dose helps. Always prepared, no mixing fussing. Just ask Paull Drug Co., for Dr. King's New Discovery. It will safeguard your child against serious ailments resulting from colds. Adv.

German Extremity.

A German staff correspondent of the New York World, writing from Berlin, gives an idea of the proportions which the food problem has reached in that country.

As an example of the restrictions which have been imposed, the use and distribution of butter is now limited to one-fourth of a pound a week to each person.

The live stock census for April has shown the necessity of greater economy in the restriction of meat consumption until fall.

Perhaps the most conclusive and striking evidence of the want which German people people is facing is the fact that a new Ministry has been established to take charge of the feeding of the Kaiser's 70,000,000 subjects. When this ministry is organized the entire empire is to be on uniform rations.

These reports coming from a source so authoritative, may explain the Kaiser's expressed inclination toward terms of peace.

Newspapers.

"There are a great many foolish folks," says an old newspaper man, "who will tell you that money is all that is necessary to make a successful newspaper. They hold that money may command brains, as it will; and that the two, working together, makes [the] great and powerful journal. But there is another quality, the lack of which makes your newspaper as important as a tool without a handle, and that quality is character, and without character no newspaper can be influential."

Newspaper "character" isn't the character of the editor nor the owner nor yet of the business office. The makers of a newspaper must have character, of course, or they will fail miserably. But the character of the paper itself is a thing that is built up slowly, a little at a time, day after day—the tendency of the paper to tell the truth, to protect no one, to oppose that which is bad and to champion that which is good.

Newspapers, even as human beings, err. They may, thru faulty judgment, at time, espouse causes that are not the causes which should have been espoused. But, month after month, year after year, taking the right side of questions and displaying unselfish fearlessness, gives the newspaper its character and its standing in the community. It is not a thing that can be purchased, it is not a commodity that money will buy, it is not a thing which any one man controls, or has a copyright upon. It is the spirit of the thing, this newspaper character, and it prevails as certainly with the newspaper as with the individual.

Why Wilson?

Because he is the greatest leader of Democracy since Andrew Jackson.

Because he is the most popular Democrat in the country, as an evidence of which there is no opposition to his renomination.

Because he is an executive who does things.

Because he has redeemed all of the important pledges of the party made in the Baltimore platform.

Because he has given the country a banking system which prevents a panic and prevents any bank from failing that is solvent.

Because the country is more prosperous under his administration than ever before.

Because he has kept the United States out of war and is the great peace President.

Because he is the greatest diplomat who ever sat in the White House, forcing Germany to agree to his ultimatum in regard to submarine warfare.

Because he is honest and capable.

Because he has not allowed the money power to control and dictate to the business of the country.

Because he has been fair and just in dealing with all the great problems of the day.

Because he has had more great questions to settle than any other president and because he has settled all of them right.—E-town News.

Ireland and America.

"Thank God for freedom's martyrs in every age and in every land," says the New York American in an editorial which is accompanied by a cartoon in which it is pointed out that had the signers of the Declaration of Independence failed they would have been shot as ruthlessly as the leaders of the Dublin "revolution."

The State Journal observed at the time of the occurrence of the Dublin outbreak that a rebel is a revolutionist who fails and a revolutionist is a rebel who succeeds. But the difference between the leaders of the American revolution and the Irish Rebellion was that the Americans had a reasonable hope of existing as an independent country if they could throw off the British yoke. There could be no reasonable hope of the existence of Ireland as an independent country at the present period of European history. To mislead the ignorant class in Ireland into a revolution which promised nothing was a bad business. We sympathize with the leaders, but the enterprise in which they lost their lives was as mad an enterprise as any one ever engaged in. Had the Irish had behind them a country with the resources of the new continent of America the only question would have been whether they could defend themselves against England. They were without such resources. Their financial and geographical situation forbids the thought of independence.

Fairly Fooled.

At a charity bazar in a small provincial town a great attraction was a tiny gray suede glove, which lay on a rose-pink satin cushion. Above it was displayed a notice reading:

"The owner of this glove will, at 7 o'clock this evening, be pleased to kiss any person who purchased a ticket before that hour."

It was such a sweet little glove that it could only belong to a lovely girl. At least, so thought the long line of young men who were waiting eagerly as the clock struck 7.

Promptly to the minute old Maydock, the local butcher, appeared. Maydock is a worthy person, but not a beauty. He calmly picked up the glove and remarked:

"Well, gents this glove belongs to me. I bought it this morning. I'm ready for you, so don't be bashful. One at a time please!"

Announcements.

FOR CONGRESS.

We are authorized to announce that CHARLES
F. MONTGOMERY, of Casey County, is a candi-
date to represent the Eighth District in the next
Congress, subject to the Democratic primary to be
held August 5, 1916.We are authorized to announce HARVEY
HELM, of Lincoln county, a Democratic candi-
date for re-nomination for Congress from the
Eighth district, subject to the August primary.

The Democratic State Convention held at Lexington, last Wednesday was harmonious throughout. A platform adopting the administrations and policies of President Wilson and Gov. Stanley met the approval of all. The delegates at large selected to attend the national convention at St. Louis are Senators O. M. James, J. C. W. Beckham, Gov. A. O. Stanley, Mayor J. H. Buschmeyer, former Senator J. N. Camden, Judge Allie W. Young, former Gov. J. B. McCreary and Lieutenant Gov. James D. Black. Gen. W. B. Holderman was elected National Committeeman to succeed Urey Woodson. Judge Charles A. Hardin was chosen Chairman of the State Central and Executive committees. The State electors are Frank Hopkins, of Prestonsburg, and James P. Edwards, of Louisville.

The delegates from the Eighth district to the St. Louis National Convention are Joshua Booles, Spencer county, and J. B. Morris, Anderson county. The elector is L. B. Herrington, of Madison county. Member of the State Central Committee, J. B. Nichols, of Boyle county, Member of the Executive committee, T. R. Welch, Jassamine county.

The Republican National Convention will convene in Chicago to-day, Tuesday, at 12 m. There are about sixteen candidates for the nomination for the Presidency. It is the field against Roosevelt. With that many candidates a combine will defeat the one in the lead.

At the State Democratic Convention J. N. Meadows, of Jamestown, was chosen the member from the Eleventh district, of the State Executive committee.

Mr. J. B. Coffey, of this place, at the State Democratic Convention, was selected by the delegates of the Eighth district, Vice President.

WAR SITUATION

London, May 25.—Continuing

their furious assaults in the Verdun region, the Germans having succeeded in again wresting the battered ruins of Fort Douaumont from the French, have driven hard against the lines west of the fort. In this new attack the Crown Prince's forces succeeded in gaining a foothold in a French trench near the Haudremont quarry, which has been the scene recently of much hard fighting.

At Fort Douaumont itself the infantry engagements waged so desperately during the early part of the week have ceased for the time being, according to the official bulletin of the French War Office.

The artillery is still notably active. Its fire has been particularly severe on the west bank of the Meuse, near Hill 304, and from Dead Man Hill to Cumieres, the village close to the river just captured by the Germans, and from which they have so far been prevented from debauching by the energetic work of the French guns.

East of Cumieres the French report having made some progress in hand grenade operations.

The repulse of three counter-attacks by the French on the Meuse, on the Verdun front, was announced by the War Office today.

The capture of additional French trenches southwest and south of Fort Douaumont and the recapture of the Haudremont quarry by the Germans are also reported.

All day attacks by the French on the German lines in the Caillotte wood, southeast of Fort Douaumont, in which the French met with severe losses, were beaten off by the Germans, who report the capture of more than 850 prisoners and fourteen machine guns.

Latest reports from the fighting on the Austro-Italian front indicate that the Austrians have driven a wedge rather deeply into Italian territory between the Arsa and Astico Valleys southeast of Trent. The Italians admittedly have been falling back in this sector, where they now report a concentration of their forces in the Arsiero basin.

Rome, May 25.—The Austrian offensive along the Italian front, which began ten days ago, is assuming more and more the character of the German offensive at Verdun. After having occupied the advanced positions from which the Italians withdrew, the Austrians now are strengthening and organizing themselves there. They have concentrated additional artillery under command of Gen. Koevess and have been attempting, but without success, to cut the Italian's rear communications for supplies. This advance of the Austrians has been rendered more difficult by the destruction of bridges and roads.

Italian officers estimate that between the Adige and Brenta Rivers the Austrians have placed twenty-six batteries of guns of 305 caliber, aside from many other batteries of smaller guns and have brought from the Galician

and Balkan fronts fresh troops to the number of eighteen divisions, or 360,000 men. Arsiero is one of the towns that has suffered most severely from the bombardment.

Austrian prisoners say that prior to the beginning of the offensive they were told that it was the intention to capture the Venetian provinces by storm, beginning with the province of Vicenza. The Austrian officers gave orders that the Austrian soldiers, once on Italian territory, must not show themselves weak, but that they must not act brutally toward the population. They promised that next summer the men might take the baths at Lido, in Venice, on the Adriatic.

This extensive movement by the Austrians is styled by them "the offensive toward the Valley of the Po River."

There is much peace talk at this time, and the news from Washington is that the United States is ready to join in any feasible association of nations to preserve the peace of the world against "political ambition and selfish hostility" and in the service of "a common order, a common justice and a common peace," according to the statement of President Wilson last night before the annual convention of the League to Enforce Peace. In outlining the lines along which the United States would move in suggesting peace to the belligerents President Wilson stated that he would insist upon the absolute freedom of the seas to all nations and a guarantee of integral territorial rights, if necessary by a universal association of nations.

This office is now printing a book of poems and prose written by Dr. J. T. Jones, who is known to a very wide circle of friends in Adair, Russell and Cumberland counties. He is a gentleman of education and his writings have been accepted by some of the leading papers and periodicals in different States. Compiling them into book form is more for preservation than for pecuniary gain. The book will be ready for disposition in a very short time, and it will be sold for a small sum, the doctor hoping to get enough out of it to cover the cost of printing. The doctor has a peculiar style, and those who know him will want his book.

Born, to the wife of Paul Solensberger, on the 22nd, a son, Mother and child getting along nicely.

Mr. George Coffey, of McGregor, Texas, in company with Mrs. J. N. Coffey, of Columbia, spent a few days of last week visiting uncle Charlie Yates and daughter, Mrs. Ella Y. Robertson of our city.

We are glad to know that it is only a few days until we will hear the hum of the Adair County Spoke Co., machinery in our town again, as they have quite a little stock on hands, and we understand from their agent, Mr. Robert Wethington, that they will receive timber here two days in each week, which will be a great help to our people that have the timber.

The rain that fell here the first of the week gave us a good tobacco season and enabled our farmers to get the larger part of their tobacco crops set. We take it that there was over one hundred acres of tobacco transplanted, as well as a great help to the growing crops of every description.

Messrs. Sparks & Co, the well-known stock dealers of Red Lick, came over and received from Rodgers & Dowell seventy-five hogs that brought them in dollars and cents \$1,500. This deal of hogs makes over four thousand dollars that has been paid in this community for hogs in the last sixty days.

I will close for this time by saying to my old friend, John Logan, of Macomb, Ill., that we will meet him at the Fair.

I keep on hands a full stock of coffins, caskets, and robes. I also keep Metallic Caskets, and Steel Boxes and two hearses. Prompt service night or day. Residence Phone 29, office phone 98.

PAULL DRUG CO., Columbia, Ky.**What is the Mexican?**

There are still numbers of
Americans who are under the
misapprehension that the Mexi-
can is some kind of negro, or, at
least, that there is a strong in-
fusion of African blood, as in
Haiti. Nothing could be further
from the truth. Not only is
there less African blood in Mex-
ico than in the United States, in
proportion to population, but
there is less even after you have
eliminated our black belt.

Many better informed persons
refer to the native Mexicans as
Indians, but they are not Indians
—as we know Indians. True
here and there in the mountain-
ous regions are found tribes of
semi savages who compare with
the native people of what is now
the United States. But they
figure in national affairs little
more than our own pureblooded
Cherokees, et al., figure here.
When the Spanish conquerer
came the bulk of the aboriginal
Mexicans were not savages, but
a civilized people, as far removed
from the wild nomads of North
America as the white race them-
selves.

This aboriginal Mexican ele-
ment is variously estimated as
representing from one-third to
one-half the population—by some
guessers even more. It has fur-
nished some of the most learned
scholars and exalted patriots
celebrated in Mexican history.
The greater part of the remain-
ing population is made up of
mixed Spanish and aboriginal
blood, from which is derived the
term, "Spanish-American." It
is to this mixture of European
and Aztec that is attributed the
peculiar traits of the "Spanish-
American" character, and sup-
posedly woeful inferiority of our
neighbors to the southward.

HUSBAND RESCUED DESPAIRING WIFE

**After Four Years of Discouraging
Conditions, Mrs. Bullock Gave
Up in Despair. Husband
Came to Rescue.**

Catron, Ky.—In an interesting letter from this place, Mrs. Bettie Bullock writes as follows: "I suffered for four years, with womanly troubles, and during this time, I could only sit up for a little while, and could not walk anywhere at all. At times, I would have severe pains in my left side.

The doctor was called in, and his treatment relieved me for a while, but I was soon confined to my bed again. After that, nothing seemed to do me any good.

I had gotten so weak I could not stand, and I gave up in despair.

At last, my husband got me a bottle of Cardui, the woman's tonic, and I commenced taking it. From the very first dose, I could tell it was helping me. I can now walk two miles without its tiring me, and am doing all my work."

If you are all run down from womanly troubles, don't give up in despair. Try Cardui, the woman's tonic. It has helped more than a million women, in its 50 years of continuous success, and should surely help you, too. Your druggist has sold Cardui for years. He knows what it will do. Ask him. He will recommend it. Begin taking Cardui today.

Clover Bloat.

Reports still continue to come in from all parts of the county of cattle dying from eating white clover. On Saturday Mr. Thomas Kirkland lost a \$75 Jersey cow. Last Thursday Mr. Buford Van Arsdale purchased a \$75 cow and on Saturday when he went to milk her he found her dead from clover bloat. There have been so many losses from this cause that the Kentucky Experiment Station has sent County Agent Gentry a remedy which he has given to the Herald for publication that it may reach the farmers all over the entire section. The Experiment Station says: "For the present we strongly recommend for acute bloating 1 quart of a 11.2 per cent., solution of the formaline which should be followed by placing a wooded block in the animal's mouth and gentle exercise if the animal can be gotten up. Formalin is a trade name for a 40 per cent., solution of formaldehyde gas in water and may be obtained at any drug store for 40 cents per pint. One-half ounce of formalin in 1 quart of water makes the proper solution with which to drench the animal.—Harrodsburg Herald.

Bro. Will Dudgeon will preach

LIFE OF SAVAGE
TRULY SENSIBLE

Ailments Almost Unknown by
Aborigines Are Common Now.

The theory that most of the ailments of today are caused almost entirely by those habits that distinguish the white man from his long ago brother, the savage, is more widely discussed every day.

The savage, in many ways, was a more sensible being than the man who made war on him and then seized his birthright. It has been said, by medical authorities, that nine out of ten cases of sickness can be traced to a disordered stomach, and that the ailments are due, in a large measure, to excessive eating and drinking and to little healthful outdoor exercise.

Common sense should be used in our mode of living. It was with this end in view that Joseph Von Trimbach, the noted chemist and originator of so many health aids, gathered herbs, roots, barks and flowers from the most remote parts of the world and spent years of his life in experimenting and study before he arrived at the solution of the problem of relieving stomach troubles. He named his discovery Tanlac. Tanlac has met with instant favor wherever it has been introduced. It has created a romance in the business world. Hundreds of thousands of sufferers have realized the benefits of this great reconstructive tonic.

Tanlac is believed to act more favorably, because of the nature of its ingredients, on ailments of the stomach, liver and kidneys, and on catarrhal affections of the mucous membranes, which, when neglected, are so often communicated to the vital organs themselves, than any other known preparation. This ideal reconstructive tonic, appetizer, invigorant and builder of tissues has been lauded by men and women in all walks of life. It has proved a boon for sufferers from those all too common ailments.

Tanlac now is being especially introduced in Columbia, at the Page & Hamilton drug store, where the Tanlac man explains its merits and the results which may be expected from its use.
